Flow Control Tools

Evolution Oil Tools has a complete selection of Flow Control Tools and accessories. The products offered are comparable to either Baker or Otis® style tools; which are the predominant styles in use worldwide.

We are pleased to offer our Flow Control products with a variety of profiles, materials and specialized threads to meet your completion requirements.

A combination of the following Flow Control products, are quite often used in order to accomplish the desired control of the production flow within your production string.

Sliding Sleeves

Our offering of Sliding Sleeves, have been used in the field with a great deal of success for decades. This Evolution product is known throughout the Flow Control Completion sector of the industry, for its reliable shifting and pressure holding capability.

Evolution's line of Slide Sleeves include the [EL Sliding Sleeve](#), [NEFD Sliding Sleeve](#), [NEFU Sliding Sleeve](#), [NERA Sliding Sleeve](#), [NERO Sliding Sleeve](#), [SLA Sliding Sleeve](#), [SLFD Sliding Sleeve](#), [SLFU Sliding Sleeve](#), [SLO Sliding Sleeve](#), [SLRA Sliding Sleeve](#), [SLRO Sliding Sleeve](#), [SLXA Sliding Sleeve](#), [SLXO Sliding Sleeve](#).

Landing / Profile Nipples

We offer a wide variety of Landing / Profile Nipples that can be installed along with our other Flow Control products to accommodate your specific production design needs, including the [EF Landing Nipple](#), [ER Landing Nipple](#), [SLR Landing Nipple](#), [SLRN Landing Nipple](#), and the [SLX Landing Nipple](#).

Check Valves

The Evolution [EFB-2 and ERB-2 Equalizing Check Valves](#) are used in any application where it is necessary to prevent fluid from flowing downward while still allowing flow upward from below through the use of a ball and seat mechanism.
